Solution: Tasks Scheduling Order

Problem Statement

There are ‘N’ tasks, labeled from ‘0’ to ‘N-1’. Each task can have some prerequisite tasks which need to be completed before it can be scheduled. Given the number of tasks and a list of prerequisite pairs, write a method to find the ordering of tasks we should pick to finish all tasks.

Example 1:

```
Input: Tasks=3, Prerequisites=[0, 1], [1, 2]
Output: [0, 1, 2]
Explanation: To execute task '1', task '0' needs to finish first. Similarly, task
'1' needs to finish before '2' can be scheduled. A possible scheduling of tasks is:
[0, 1, 2]
```

Example 2:

```
Input: Tasks=3, Prerequisites=[0, 1], [1, 2], [2, 0]
Output: []
Explanation: The tasks have a cyclic dependency, therefore they cannot be
scheduled.
```

Example 3:

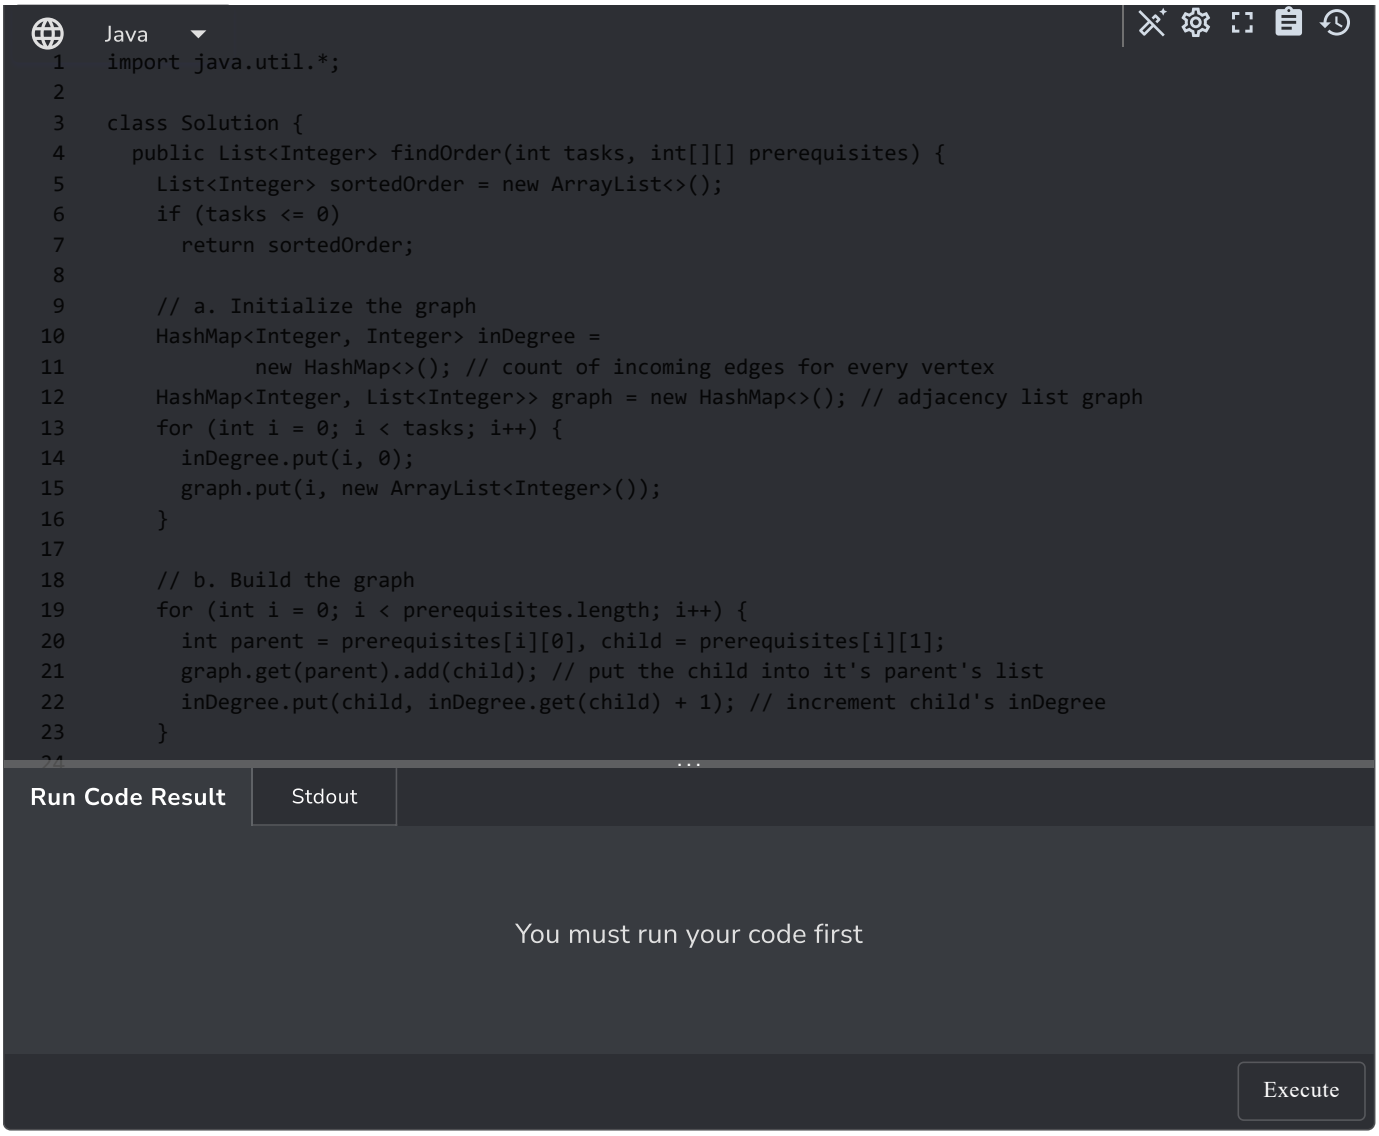

```
Input: Tasks=6, Prerequisites=[2, 5], [0, 5], [0, 4], [1, 4], [3, 2], [1, 3]
Output: [0 1 4 3 2 5]
Explanation: A possible scheduling of tasks is: [0 1 4 3 2 5]
```

Solution

This problem is similar to `Tasks Scheduling`, the only difference being that we need to find the best ordering of tasks so that it is possible to schedule them all.

Code

Here is what our algorithm will look like:

Time Complexity

In step ‘d’, each task can become a source only once and each edge (prerequisite) will be accessed and removed once. Therefore, the time complexity of the above algorithm will be O(V+E), where ‘V’ is the total number of tasks and ‘E’ is the total number of prerequisites.

Space Complexity

The space complexity will be O(V+E), since we are storing all of the prerequisites for each task in an adjacency list.

Similar Problems

Course Schedule: There are ‘N’ courses, labeled from ‘0’ to ‘N-1’. Each course has some prerequisite courses which need to be completed before it can be taken. Given the number of courses and a list of

prerequisite pairs, write a method to find the best ordering of the courses that a student can take in order to finish all courses.

Solution: This problem is exactly similar to our parent problem. In this problem, we have courses instead of tasks.
