Problem 5: Ransom Note (easy)

Problem Statement

Given two strings, one representing a ransom note and the other representing the available letters from a magazine, determine if it's possible to construct the ransom note using only the letters from the magazine. Each letter from the magazine can be used only once.

Examples:

1. **Example 1**:
   - Input: Ransom Note = "hello", Magazine = "hellworld"
   - Expected Output: true
   - Justification: The word "hello" can be constructed from the letters in "hellworld".
2. **Example 2**:
   - Input: Ransom Note = "notes", Magazine = "stoned"
   - Expected Output: true
   - Justification: The word "notes" can be fully constructed from "stoned" from its first 5 letters.
3. **Example 3**:
   - Input: Ransom Note = "apple", Magazine = "pale"
   - Expected Output: false
   - Justification: The word "apple" cannot be constructed from "pale" as we are missing one 'p'.

Try it yourself

Try solving this question here:

Java

```java
import java.util.HashMap;

public class Solution {
    public boolean canConstruct(String ransomNote, String magazine) {
        // ToDo: Write Your Code Here.
        return false;
    }
}
```

```
9
```

Test Case | Run Code Result | Stdout

```
"hello"
"hellworld"
```

Use Example Testcases | Run | Submit
