Minimum Depth of a Binary Tree (easy)

Problem Statement

Find the minimum depth of a binary tree. The minimum depth is the number of nodes along the **shortest path from the root node to the nearest leaf node.**

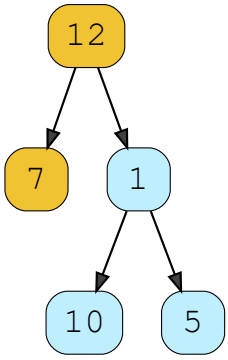

Example 1:

Minimum Depth: 2

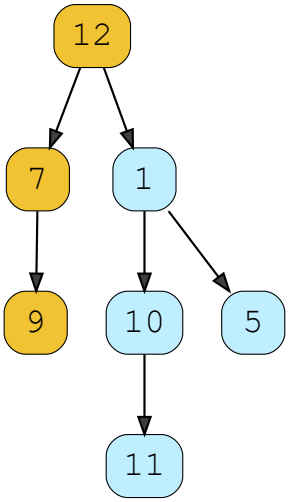

Example 2:

Minimum Depth: 2

Minimum Depth: 3

Try it yourself

Try solving this question here:

Java

```java
import java.util.*;

/*class TreeNode {
  int val;
  TreeNode left;
  TreeNode right;

  TreeNode(int x) {
    val = x;
  }
};*/

class Solution {
  public int findDepth(TreeNode root) {
    int minimumTreeDepth = 0;
    // TODO: Write your code here
    return minimumTreeDepth;
  }
}

```
