Problem Challenge 1: Connect All Level Order Siblings (medium)

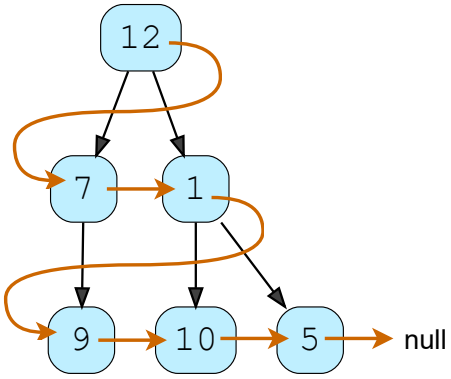

Problem Statement

Given a binary tree, connect each node with its level order successor. The last node of each level should point to the first node of the next level.

Example 1:

Example 2:

Try it yourself

Try solving this question here:

```
Java
1   import java.util.*;
2
3   /*class TreeNode {
4     int val;
```

```
    TreeNode left;
    TreeNode right;
    TreeNode next;

    TreeNode(int x) {
      val = x;
      left = right = next = null;
    }
  };*/

  class Solution {
    public TreeNode connect(TreeNode root) {
      // TODO: Write your code here
      return root;
    }
  }

```

Test Case | Run Code Result | Stdout

```
[12,7,1,9,10,5]
```

Use Example Testcases | Run | Submit
