Problem Challenge 2: Right View of a Binary Tree (easy)

Problem Statement

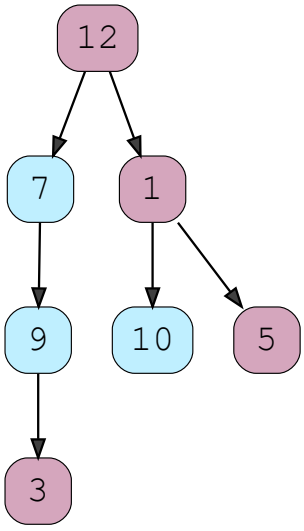

Given a binary tree, return an array containing nodes in its right view. The right view of a binary tree is the set of **nodes visible when the tree is seen from the right side.**

Example 1

Right View: [1, 3, 7]

Exampe 2

Right View: [12, 1, 5, 3]

Try it yourself

Try solving this question here:

Java

```
1  import java.util.*;
```

```
2
3   /*class TreeNode {
4     int val;
5     TreeNode left;
6     TreeNode right;
7
8     TreeNode(int x) {
9       val = x;
10    }
11  };*/
12
13  class Solution {
14    public static List<Integer> traverse(TreeNode root) {
15      List<Integer> result = new ArrayList<>();
16      // TODO: Write your code here
17
18      return result;
19    }
20  }
21
```

Test Case | Run Code Result | Stdout

```
[1,2,3,4,5]
```

Use Example Testcases | Run | Submit
