Binary Tree Path Sum (easy)

Problem Statement

Given a binary tree and a number ‘S’, find if the tree has a path from root-to-leaf such that the sum of all the node values of that path equals ‘S’.

Example 1:

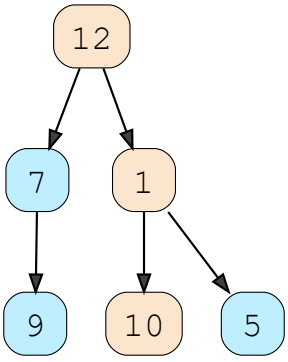

S: 10
Output: true
Explanation: The path with sum '10' is highlighted

Example 2:

S: 23
Output: true
Explanation: The path with sum '23' is highlighted

S: 16
Output: false
Explanation: There is no root-to-leaf path with sum '16'.

Try it yourself

Try solving this question here:

Java

```
/*class TreeNode {
  int val;
  TreeNode left;
  TreeNode right;

  TreeNode(int x) {
```

```
7       val = x;
8     }
9   };*/
10
11  class Solution {
12    public static boolean hasPath(TreeNode root, int sum) {
13      // TODO: Write your code here
14      return false;
15    }
16  }
17
```

Test Case | Run Code Result | Stdout

```
[12,7,1,9,null,10,5]
23
```

Use Example Testcases | Run | Submit
