Path With Given Sequence (medium)

Problem Statement

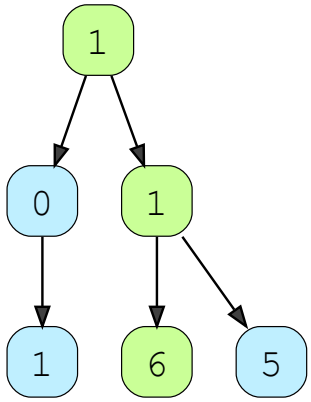

Given a binary tree and a number sequence, find if the sequence is present as a root-to-leaf path in the given tree.

Example 1:

Sequence: [1, 9, 9]
Output: true
Explanation: The tree has a path 1 -> 9 -> 9.

Example 2:

Sequence: [1, 0, 7]
Output: false
Explanation: The tree does not have a path 1 -> 0 -> 7.

Sequence: [1, 1, 6]
Output: true
Explanation: The tree has a path 1 -> 1 -> 6.

Try it yourself

Try solving this question here:

Java

```
import java.util.*;

/*class TreeNode {
  int val;
  TreeNode left;
  TreeNode right;
```

```
  7
  8     TreeNode(int x) {
  9       val = x;
 10     }
 11   };*/
 12
 13   class Solution {
 14     public boolean findPath(TreeNode root, int[] sequence) {
 15       // TODO: Write your code here
 16       return false;
 17     }
 18   }
 19
```

Test Case | Run Code Result | Stdout

```
[1,0,1,1,null,6,5]
[1,0,1]
```

Use Example Testcases | Run | Submit
