All Paths for a Sum (medium)

Problem Statement

Given a binary tree and a number ‘S’, find all paths from root-to-leaf such that the sum of all the node values of each path equals ‘S’.

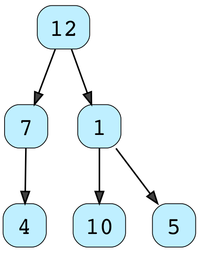

Example 1:

S: 12
Output: [[1, 7, 4], [1, 9, 2]]
Explanation: Here are the two paths with sum '12':
1 -> 7 -> 4 and 1 -> 9 -> 2

Example 2:

S: 23
Output: [[12, 7, 4], [12, 1, 10]]
Explanation: Here are the two paths with sum '23':
12 -> 7 -> 4 and 12 -> 1 -> 10

Try it yourself

Try solving this question here:

Java

```java
import java.util.*;

/*class TreeNode {
  int val;
  TreeNode left;
  TreeNode right;

  TreeNode(int x) {
    val = x;
  }
};*/

class Solution {
  public List<List<Integer>> findPaths(TreeNode root, int sum) {
    List<List<Integer>> allPaths = new ArrayList<>();
    // TODO: Write your code here
    return allPaths;
  }
}
```

Test Case | Run Code Result | Stdout

```
[12,7,1,4,null,10,5]
23
```

Use Example Testcases | Run | Submit
