# Path With Given Sequence (medium)

## Problem Statement

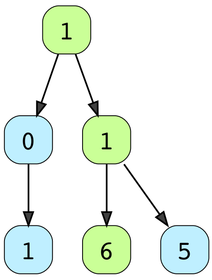

Given a binary tree and a number sequence, find if the sequence is present as a root-to-leaf path in the given tree.

**Example 1:**

Sequence: [1, 9, 9]
Output: true
Explanation: The tree has a path 1 -> 9 -> 9.

**Example 2:**

Sequence: [1, 0, 7]
Output: false
Explanation: The tree does not have a path 1 -> 0 -> 7.

Sequence: [1, 1, 6]
Output: true
Explanation: The tree has a path 1 -> 1 -> 6.

## Try it yourself

Try solving this question here:

Java

```java
import java.util.*;

/*class TreeNode {
  int val;
  TreeNode left;
  TreeNode right;

  TreeNode(int x) {
    val = x;
  }
};*/

class Solution {
  public boolean findPath(TreeNode root, int[] sequence) {
    // TODO: Write your code here
    return false;
  }
}
```

Test Case | Run Code Result | Stdout

```
[1,0,1,1,null,6,5]
[1,0,1]
```

Use Example Testcases | Run | Submit
