Problem Challenge 1: Count of Subset Sum (hard)

Problem Statement

Given a set of positive numbers, find the total number of subsets whose sum is equal to a given number ‘S’.

Example 1:

```
Input: {1, 1, 2, 3}, S=4
Output: 3
The given set has '3' subsets whose sum is '4': {1, 1, 2}, {1, 3}, {1, 3}
Note that we have two similar sets {1, 3}, because we have two '1' in our input.
```

Example 2:

```
Input: {1, 2, 7, 1, 5}, S=9
Output: 3
The given set has '3' subsets whose sum is '9': {2, 7}, {1, 7, 1}, {1, 2, 1, 5}
```

Try it yourself

Try solving this question here:

Java

```java
class Solution {
  public static int countSubsets(int[] num, int sum) {
    //TODO: Write - Your - Code
    return -1;
  }
}

```

Test Case | Run Code Result | Stdout

[1,1,2,3]
4

Use Example Testcases | Run | Submit
