Smallest Subarray With a Greater Sum (easy)

Problem Statement

Given an array of positive integers and a number ‘S,’ find the length of the **smallest** contiguous subarray whose sum is **greater than or equal to 'S'**. Return 0 if no such subarray exists.

Example 1:

```
Input: [2, 1, 5, 2, 3, 2], S=7
Output: 2
Explanation: The smallest subarray with a sum greater than or equal to
'7' is [5, 2].
```

Example 2:

```
Input: [2, 1, 5, 2, 8], S=7
Output: 1
Explanation: The smallest subarray with a sum greater than or equal to
'7' is [8].
```

Example 3:

```
Input: [3, 4, 1, 1, 6], S=8
Output: 3
Explanation: Smallest subarrays with a sum greater than or equal to '8'
are [3, 4, 1] or [1, 1, 6].
```
