Reverse every K-element Sub-list (medium)

Problem Statement

Given the head of a LinkedList and a number ‘k’, **reverse every ‘k’ sized sub-list starting from the head.**

If, in the end, you are left with a sub-list with less than ‘k’ elements, reverse it too.

Example:

Try it yourself

Try solving this question here:

```java
import java.util.*;

/*class ListNode {
  int val = 0;
  ListNode next;

  ListNode(int value) {
    this.val = value;
  }
}*/

class Solution {

  public ListNode reverse(ListNode head, int k) {
    // TODO: Write your code here
    return head;
  }
}
```

Test Case | Run Code Result | Stdout

```
[1,2,3,4,5,6]
2
```

Use Example Testcases | Run | Submit
