Zigzag Traversal (medium)

Problem Statement

Given a binary tree, populate an array to represent its zigzag level order traversal. You should populate the values of all **nodes of the first level from left to right**, then **right to left for the next level** and keep alternating in the same manner for the following levels.

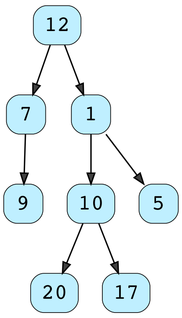

Example 1:

Zigzag Level Order Traversal: [[1],
[3, 2],
[4, 5, 6, 7]]

Example 2:

Zigzag Level Order Traversal: [[12],
[1,7],
[9,10,5]
[17,20]]

Try it yourself

Try solving this question here:

Java

```
import java.util.*;

/*class TreeNode {
  int val;
  TreeNode left;
  TreeNode right;

  TreeNode(int x) {
    val = x;
  }
};*/

class Solution {
  public List<List<Integer>> traverse(TreeNode root) {
    List<List<Integer>> result = new LinkedList<List<Integer>>();
    // TODO: Write your code here
    return result;
  }
}
```

Test Case | Run Code Result | Stdout

[12,1,7,9,10,5,17,20]

Use Example Testcases | Run | Submit
