Number Range (medium)

Problem Statement

Given an array of numbers sorted in ascending order, find the range of a given number ‘key’. The range of the ‘key’ will be the first and last position of the ‘key’ in the array.

Write a function to return the range of the ‘key’. If the ‘key’ is not present return [-1, -1].

Example 1:

```
Input: [4, 6, 6, 6, 9], key = 6
Output: [1, 3]
```

Example 2:

```
Input: [1, 3, 8, 10, 15], key = 10
Output: [3, 3]
```

Example 3:

```
Input: [1, 3, 8, 10, 15], key = 12
Output: [-1, -1]
```

Try it yourself

Try solving this question here:

Java

```java
class Solution {

  public int[] findRange(int[] arr, int key) {
    int[] result = new int[] { -1, -1 };
    // TODO: Write your code here
    return result;
  }
}

```

Test Case | Run Code Result | Stdout

[4, 6, 6, 6, 9]
6

Use Example Testcases | Run | Submit
