Subarrays with Product Less than a Target (medium)

Problem Statement

Given an array with positive numbers and a positive target number, find all of its contiguous subarrays whose **product is less than the target number**.

Example 1:

```
Input: [2, 5, 3, 10], target=30
Output: [2], [5], [2, 5], [3], [5, 3], [10]
Explanation: There are six contiguous subarrays whose product is less
than the target.
```

Example 2:

```
Input: [8, 2, 6, 5], target=50
Output: [8], [2], [8, 2], [6], [2, 6], [5], [6, 5]
Explanation: There are seven contiguous subarrays whose product is less
than the target.
```

Try it yourself

Try solving this question here:

Java

```java
import java.util.*;

class Solution {

  public List<List<Integer>> findSubarrays(int[] arr, int target) {
    List<List<Integer>> result = new ArrayList<>();
    // TODO: Write your code here
    return result;
  }
}

```

Test Case | Run Code Result | Stdout

[2, 5, 3, 10]
30

Use Example Testcases | Run | Submit
