Longest Subarray with Ones after Replacement (hard)

Problem Statement

Given an array containing 0s and 1s, if you are allowed to **replace no more than 'k' 0s with 1s**, find the length of the **longest contiguous subarray having all 1s.**

Example 1:

```
Input: Array=[0, 1, 1, 0, 0, 0, 1, 1, 0, 1, 1], k=2
Output: 6
Explanation: Replace the '0' at index 5 and 8 to have the longest contig
uous subarray of 1s having length 6.
```

Example 2:

```
Input: Array=[0, 1, 0, 0, 1, 1, 0, 1, 1, 0, 0, 1, 1], k=3
Output: 9
Explanation: Replace the '0' at index 6, 9, and 10 to have the longest c
ontiguous subarray of 1s having length 9.
```

Try it yourself

Try solving this question here:

Java

```java

class Solution {
    public int findLength(int[] arr, int k) {
      int maxLength = 0;
      // TODO: Write your code here
      return maxLength;
    }
}

```

Test Case | Run Code Result | Stdout

[0, 1, 1, 0, 0, 0, 1, 1, 0, 1, 1]
2

Use Example Testcases | Run | Submit
