Maximum Sum Increasing Subsequence

Problem Statement

Given a number sequence, find the increasing subsequence with the highest sum. Write a method that returns the highest sum.

Example 1:

```
Input: {4,1,2,6,10,1,12}
Output: 32
Explanation: The increaseing sequence is {4,6,10,12}.
Please note the difference, as the LIS is {1,2,6,10,12} which has a sum
of '31'.
```

Example 2:

```
Input: {-4,10,3,7,15}
Output: 25
Explanation: The increaseing sequences are {10, 15} and {3,7,15}.
```

Try it yourself

Try solving this question here:

Java

```java

class Solution {

  public int findMSIS(int[] nums) {
      // TODO: Write your code here
      return -1;
  }
}

```

Test Case | Run Code Result | Stdout

[4,1,2,6,10,1,12]

Use Example Testcases | Run | Submit
