# Shortest Common Super-sequence

## Problem Statement

Given two sequences 's1' and 's2', write a method to find the length of the shortest sequence which has 's1' and 's2' as subsequences.

**Example 2**:

```
Input: s1: "abcf" s2:"bdcf"
Output: 5
Explanation: The shortest common super-sequence (SCS) is "abdcf".
```

**Example 2**:

```
Input: s1: "dynamic" s2:"programming"
Output: 15
Explanation: The SCS is "dynprogrammicng".
```

## Try it yourself

Try solving this question here:

Java

```java

class Solution {

  public int findSCSLength(String s1, String s2) {
    // TODO: Write your code here
    return -1;
  }
}

```

Test Case | Run Code Result | Stdout

"abcf"
"bdcf"

Use Example Testcases | Run | Submit
