Quiz: Cassandra

Quiz ?

Statement

In CAP theorem terms, Cassandra is ___ system?

Select Multiple Options

☐ AP (Available and Partition Tolerant)
☐ CP (Consistent and Partition Tolerant)
☐ CA (Consistent and Available Tolerant)

Check Answer

Quiz ?

Statement

Read repair ALWAYS happens when the consistency level is set to

Select Multiple Options

☐ One
☐ Two
☐ Quorum
☐ All

Check Answer

Quiz ?

Statement

Nodes can only gossip with specific other nodes in the cluster.

Select Multiple Options

☐ True
☐ False

Check Answer

Quiz ?

Statement

Cassandra automatically assigns tokens to Vnodes.

Select Multiple Options

☐ True
☐ False

Check Answer

Quiz ?

Statement

Snitch is used for

Select Multiple Options

☐ Communicating with other nodes.
☐ Determining each node's rack and datacenter.
☐ Assigning a leader node in the cluster.
☐ Notifying the coordinator node what partition is down.

Check Answer

Quiz ?

Statement

When does a client acknowledge the write

Select Multiple Options

☐ After writing to the commit log and SSTable
☐ After writing to the MemTable and SSTable
☐ After writing to the MemTable
☐ After writing to the commit log and MemTable

Check Answer

Quiz ?

Statement

Which of the following are stored and sorted by the clustering columns? Check all that apply

Select Multiple Options

☐ Commit log
☐ SSTable
☐ Row cache
☐ MemTable

Check Answer

Quiz ?

Statement

Which of the following structures are accessed from the disk? Check all that apply.

Select Multiple Options

☐ Key cache
☐ SSTable
☐ Bloom filter
☐ Partition index
☐ Partition summary

Check Answer

Quiz ?

Statement

The partition summary.

Select Multiple Options

☐ stores the most recently accessed records.
☐ stores the byte offsets into the partition index.
☐ stores the actual partition.
☐ stores the partition byte offsets in the SSTable.

Check Answer

Quiz ?

Statement

All tombstones are discarded during compactions.

Select Multiple Options

☐ True
☐ False

Check Answer

Quiz ?

Statement

Which Cassandra consistency level means a majority of the replicas in each datacenter must respond?

Select Multiple Options

☐ EACH_QUORUM
☐ ANY
☐ QUORUM
☐ MOST

Check Answer

Quiz ?

Statement

What is the role of the partitioner?

Select Multiple Options

☐ To organize the data together physically on the disk
☐ To hash the partition key to determine the partition token
☐ To physically separate rows into equal-sized columns
☐ To notify the coordinator node what partition is down
