Quiz: HDFS

Test your knowledge of HDFS by completing this quiz.

Quiz ?

Statement

In HDFS, files are divided into ---- blocks.

Select Multiple Options

- [ ] Variable size
- [ ] Fixed size
- [ ] Both fixed and variable size
- [ ] None of the above

Check Answer

Quiz ?

Statement

Random writes into files in HDFS are

Select Multiple Options

- [ ] Frequent
- [ ] Very Frequent
- [ ] Less Frequent
- [ ] Not possible

Check Answer

Quiz ?

Statement

What kind of consistency model does HDFS offer?

Select Multiple Options

- [ ] Strong consistency
- [ ] Weak consistency

Check Answer

Quiz ?

Statement

Does a file in HDFS smaller than a single block occupy a block's full storage?

Select Multiple Options

- [ ] Yes
- [ ] No

Check Answer

Quiz ?

Statement

What is the purpose of secondary NameNode?

Select Multiple Options

- [ ] Secondary and primary NN runs on the same machine.
- [ ] Secondary NN works as is a backup server and takes control when the primary NN fails.
- [ ] Secondary NN serves metadata read requests.
- [ ] Secondary NN periodically merges the EditLog and FsImage and sends the merged image to primary NN.

Check Answer

Quiz ?

Statement

HDFS is designed after GFS but does not support

Select Multiple Options

- [ ] Concurrent appends.
- [ ] Partial file reads.
- [ ] Redundancy for file storage.
- [ ] Distributing a file's contents across multiple storage servers.

Check Answer

Quiz ?

Statement

What is the default replication policy in HDFS? Select all that apply.

Select Multiple Options

- [ ] No DataNode will contain more than one replica of any block.
- [ ] At least one replica should reside in another datacenter.
- [ ] If there are enough racks available, no rack will contain more than two replicas of the same block.
- [ ] HDFS always tries to place one replica on the client machine.
