# Quiz: HDFS

Test your knowledge of HDFS by completing this quiz.

### Quiz ?

Statement

**In HDFS, files are divided into ---- blocks.**

Select Multiple Options

False ⊗
☐ Variable size

Correct ✓
☑ Fixed size

False ⊗
☐ Both fixed and variable size

False ⊗
☐ None of the above

Check Answer

Correct Answer ✓

### Quiz ?

Statement

**Random writes into files in HDFS are**

Select Multiple Options

False ⊗
☐ Frequent

False ⊗
☐ Very Frequent

False ⊗
☐ Less Frequent

Correct ✓
☑ Not possible

Check Answer

Correct Answer ✓

### Quiz ?

Statement

**What kind of consistency model does HDFS offer?**

Select Multiple Options

Correct ✓
☑ Strong consistency

False ⊗
☐ Weak consistency

Check Answer

Correct Answer ✓

### Quiz ?

Statement

**Does a file in HDFS smaller than a single block occupy a block's full storage?**

Select Multiple Options

False ⊗
☐ Yes

Correct ✓
☑ No

Check Answer

Correct Answer ✓

### Quiz ?

Statement

**What is the purpose of secondary NameNode?**

Select Multiple Options

False ⊗
☐ Secondary and primary NN runs on the same machine.

False ⊗
☐ Secondary NN works as is a backup server and takes control when the primary NN fails.

False ⊗
☐ Secondary NN serves metadata read requests.

Correct ✓
☑ Secondary NN periodically merges the EditLog and FsImage and sends the merged image to primary NN.

Check Answer

Correct Answer ✓

### Quiz ?

Statement

**HDFS is designed after GFS but does not support**

Select Multiple Options

Correct ✓
☑ Concurrent appends.

False ⊗
☐ Partial file reads.

False ⊗
☐ Redundancy for file storage.

False ⊗
☐ Distributing a file's contents across multiple storage servers.

Check Answer

Correct Answer ✓

### Quiz ?

Statement

**What is the default replication policy in HDFS? Select all that apply.**

Select Multiple Options

Correct ✓
☑ No DataNode will contain more than one replica of any block.

False ⊗
☐ At least one replica should reside in another datacenter.

Correct ✓
☑ If there are enough racks available, no rack will contain more than two replicas of the same block.

False ⊗
☐ HDFS always tries to place one replica on the client machine.

Check Answer

Correct Answer ✓
