Course Overview

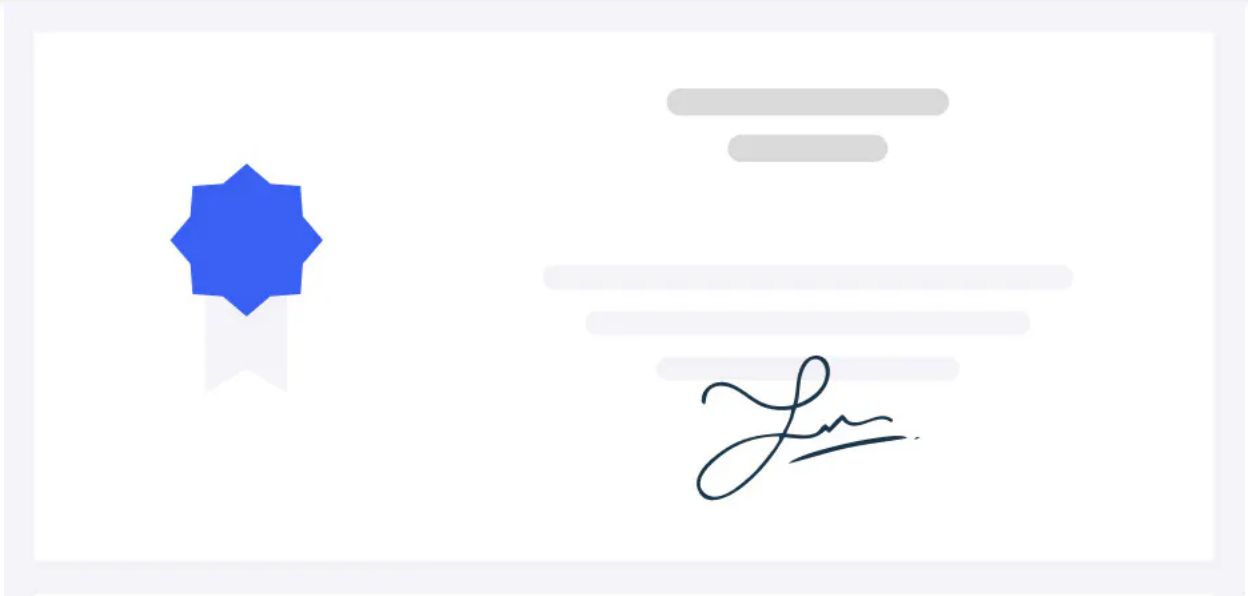

Object-oriented design has always been a critical part of the software engineering interview process. Most of the engineers struggle with the object-oriented design interviews (OODI), partly because of their lack of experience in laying down the design of a complex system, and partly because of the unstructured nature of OODI. Even engineers, who have some sort of experience in building such systems are not comfortable with these interviews. It is mainly because of the open-ended nature of the design problems that don't have a standard answer.

This course is a complete guide to master the OODI. It is created by Design Gurus who are a team of hiring managers from Google, Facebook, Microsoft, and Amazon. It not only has a set of carefully handpicked case studies, which have been repeatedly asked at the top tech companies but also provides a thorough experience to handle different object-oriented design scenarios. While code is not the emphasis of this course, some code examples in Java and Python are provided throughout.

Let's get started!

Course Content

Object-Oriented Basics
OO Analysis and Design
What is UML?
Use Case Diagrams
Class Diagram
Activity Diagrams
Sequence diagram

2. Object Oriented Design Case Studies

16 chapters

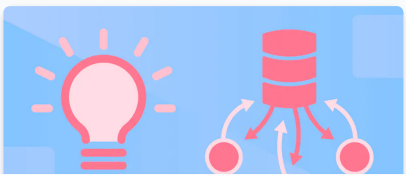

Design a Library Management System
Design a Parking Lot
Design Amazon - Online Shopping System
Design Stack Overflow
Design a Movie Ticket Booking System
Design an ATM
Design an Airline Management System
Design Blackjack and a Deck of Cards
Design a Hotel Management System
Design a Restaurant Management system
Design Chess
Design an Online Stock Brokerage System
Design a Car Rental System
Design LinkedIn
Design Cricinfo
Design Facebook - a social network

3. Appendix

2 chapters

What people say about our courses

MO JAFRI
Software Engineer

The courses which have "grokking" before them, are exceptionally well put together! These courses magically condense 3 years of CS in short bite-size courses and lectures (I have tried System Design, OODI, and Coding patterns). The Grokking courses are godsent, to be honest.

AHMET HANIF
Software Engineer

Whoever put this together, you folks are life savers. Thank you :)
