# Shortest Common Super-sequence

## Problem Statement

Given two sequences 's1' and 's2', write a method to find the length of the shortest sequence which has 's1' and 's2' as subsequences.

**Example 2**:

```
Input: s1: "abcf" s2:"bdcf"
Output: 5
Explanation: The shortest common super-sequence (SCS) is "abdcf".
```

**Example 2**:

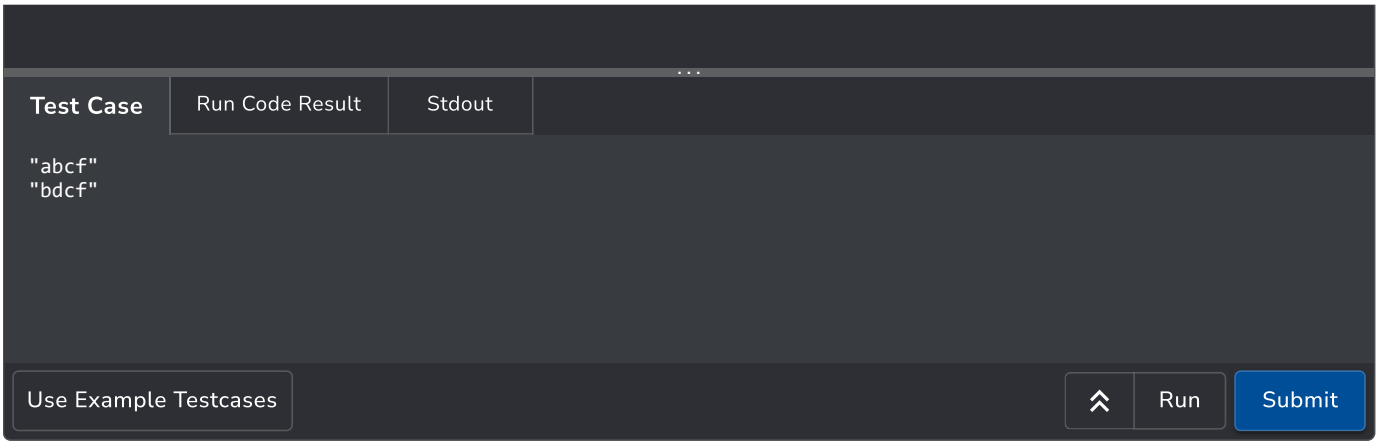

```
Input: s1: "dynamic" s2:"programming"
Output: 15
Explanation: The SCS is "dynprogrammicng".
```

## Try it yourself

Try solving this question here:

Java

```
1
2   class Solution {
3
4     public int findSCSLength(String s1, String s2) {
5         // TODO: Write your code here
6         return -1;
7     }
8   }
9
```
