Select Option

○ Only by the producer who initially wrote it

○ By any producer

○ Never

○ By the controller broker

Check Answer

Quiz ?

Statement

How many brokers will be marked as leaders of a partition?

Select Multiple Options

☐ Zero

☐ One

☐ Five

☐ All in-sync replicas (ISR)

Check Answer

Quiz ?

Statement

What is the default partition strategy for producers without using a key?

Select Multiple Options

☐ Round-robin

☐ Broker with the lowest load is preferred

☐ Partition with the lowest write load is preferred

☐ Partition with the lowest read load is preferred

Check Answer

Quiz ?

Statement

Within a partition, a message is uniquely identified by its

Select Multiple Options

☐ Offset

☐ Key

☐ ID

☐ Timestamp

Check Answer

Quiz ?

Statement

Can two consumers from two different consumer groups consume the same message?

Select Multiple Options

☐ Yes

☐ No

Check Answer

Quiz ?

Statement

Which of the following statement is true about a Kafka topic?

Select Multiple Options

☐ Only a single producer can publish messages to a topic.

☐ Only a single consumer can subscribe to the messages of a topic.

☐ A consumer can insert a message into any offset within a topic.

☐ Multiple consumers can subscribe to the messages written to a topic.

Check Answer

Quiz ?

Statement

Test your knowledge of Kafka by completing this quiz.
| * Does each consumer group have its own offset for every partition of a topic?

Select Multiple Options

☐ A) Yes

☐ B) No

Check Answer

Quiz ?

Statement

Which statement about consumer groups is not true?

Select Multiple Options

☐ Each partition of a topic can be assigned to only one consumer in a consumer group.

☐ Different partitions of a topic can be assigned to a consumer in a consumer group.

☐ If a consumer stops, Kafka spreads its partitions across the remaining consumer in the same consumer group.

☐ Within a consumer group, Kafka ensures that each consumer receives at least one partition of a topic.

Check Answer

Quiz ?

Statement

What is the optimum number of consumers within a consumer group?

Select Multiple Options

☐ Greater than the number of partitions of the topic they are consuming

☐ Equal to the number of partitions of the topic they are consuming

☐ Less than the number of partitions of the topic they are consuming

Check Answer

Quiz ?

Statement

Does Kafka guarantee that messages with the same 'key' are written to the same partition?

Select Multiple Options

☐ Yes

☐ No

Check Answer

Quiz ?

Statement

Kafka can use the following criteria to delete old messages. Select all that apply.

Select Multiple Options

☐ Time-based limits

☐ Size-based limits

☐ Key-based limits

☐ Compaction
