Problem Challenge 3: Rotation Count (medium)

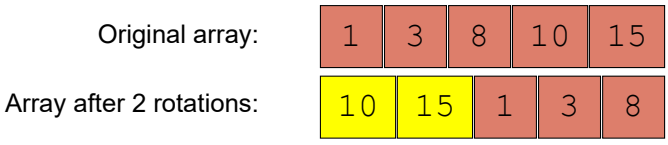

Problem Statement

Given an array of numbers which is sorted in ascending order and is rotated ‘k’ times around a pivot, find ‘k’.

You can assume that the array does not have any duplicates.

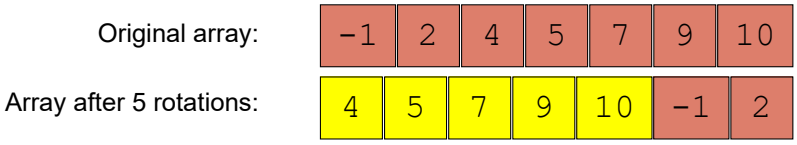

Example 1:

```
Input: [10, 15, 1, 3, 8]
Output: 2
Explanation: The array has been rotated 2 times.
```

Example 2:

```
Input: [4, 5, 7, 9, 10, -1, 2]
Output: 5
Explanation: The array has been rotated 5 times.
```

Example 3:

```
Input: [1, 3, 8, 10]
Output: 0
Explanation: The array has not been rotated.
```

Try it yourself

Try solving this question here:

Java

```java
class Solution {

  public int countRotations(int[] arr) {
    // TODO: Write your code here
    return 0;
  }

}

```

Test Case | Run Code Result | Stdout

```
[10, 15, 1, 3, 8]
```

Use Example Testcases | Run | Submit
