# Frequency Sort (medium)

## Problem Statement

Given a string, sort it based on the decreasing frequency of its characters.

**Example 1:**

```
Input: "Programming"
Output: "rrggmmPiano"
Explanation: 'r', 'g', and 'm' appeared twice, so they need to appear before any other character.
```

**Example 2:**

```
Input: "abcbab"
Output: "bbbaac"
Explanation: 'b' appeared three times, 'a' appeared twice, and 'c' appeared only once.
```

## Try it yourself

Try solving this question here:

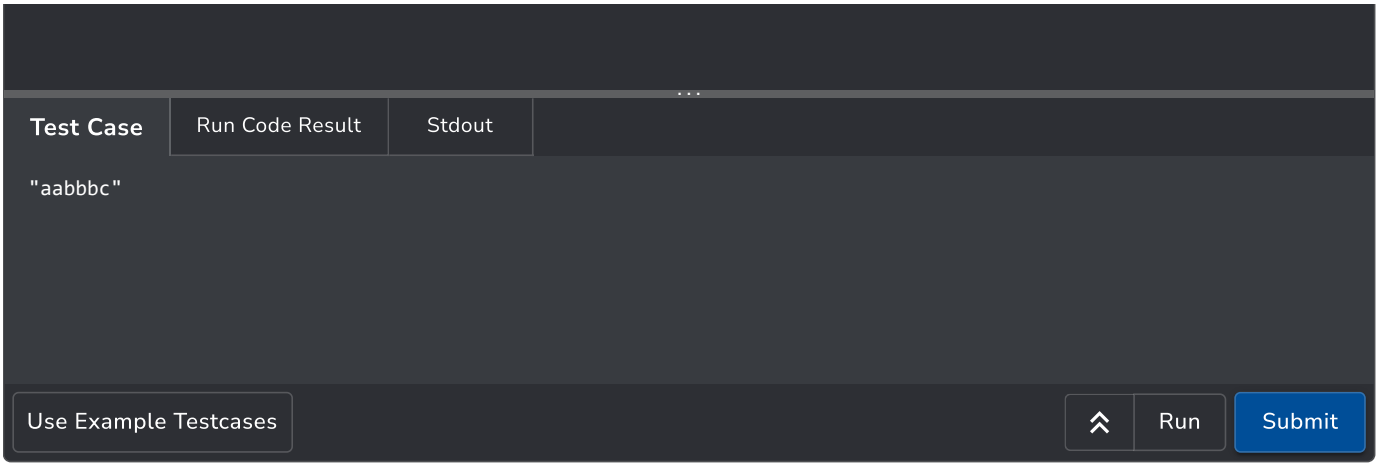

Java

```
import java.util.*;

class Solution {

  public String sortCharacterByFrequency(String str) {
    // TODO: Write your code here
    return "";
  }
}

```
