Problem Challenge 1: Rearrange String K Distance Apart (hard)

Problem Statement

Given a string and a number ‘K’, find if the string can be rearranged such that the same characters are at least ‘K’ distance apart from each other.

Example 1:

```
Input: "mmpp", K=2
Output: "mpmp" or "pmpm"
Explanation: All same characters are 2 distance apart.
```

Example 2:

```
Input: "Programming", K=3
Output: "rgmPrgmiano" or "gmringmrPoa" or "gmrPagimnor" and a few more
Explanation: All same characters are 3 distance apart.
```

Example 3:

```
Input: "aab", K=2
Output: "aba"
Explanation: All same characters are 2 distance apart.
```

Example 4:

```
Input: "aappa", K=3
Output: ""
Explanation: We cannot find an arrangement of the string where any two 'a' are 3
distance apart.
```

Try it yourself

Try solving this question here:

```
5     public String reorganizeString(String str, int k) {
6       // TODO: Write your code here
7       return str;
8     }
9   }
10
```

Test Case | Run Code Result | Stdout

```
"Programming"
3
```

Use Example Testcases | Run | Submit
