8. Pascal's Triangle

Problem Statement:

Write a Recursive Solution to Generate Pascal's Triangle.

Write a recursive function to generate Pascal's Triangle up to a given number of rows. Pascal's Triangle is a triangular array of binomial coefficients, where each number is the sum of the two numbers directly above it.

Example:

Sr#	Input	Output	Explanation
1	numRows = 3	[[1],[1,1],[1,2,1]]	The first 3 rows of Pascal's Triangle are [[1],[1,1],[1,2,1]].
2	numRows = 5	[[1],[1,1],[1,2,1],[1,3,3,1],[1,4,6,4,1]]	The first 5 rows of Pascal's Triangle are [[1],[1,1],[1,2,1],[1,3,3,1],[1,4,6,4,1]].
3	numRows = 1	[[1]]	The first row of Pascal's Triangle is [[1]].

Try it yourself

Try solving this question here:

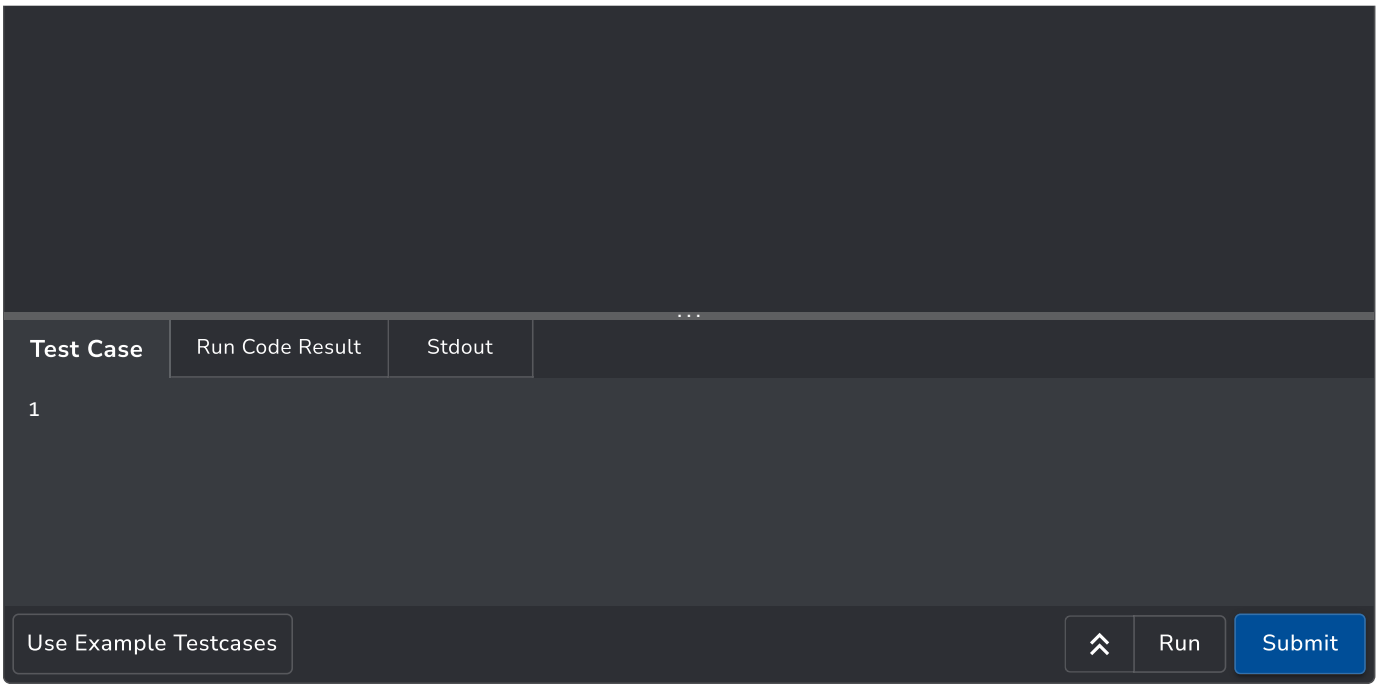

Java

```java
import java.util.ArrayList;
import java.util.List;

public class Solution {

    public static List<List<Integer>> generatePascalTriangle(int numRows) {
        List<List<Integer>> triangle = new ArrayList<List<Integer>>();
        // TODO: Write your code here
        return triangle;
    }
}

```
