13. Quick Sort

Problem Statement

Write Recursive Approach for Quick Sort

Given an array of integers, sort it in ascending order using the Quick Sort algorithm.

Examples

Sr#	Input Array	Output	Description
1	[4, 2, 6, 8, 3]	[2, 3, 4, 6, 8]	The array is sorted in ascending order.
2	[10, 5, 3, 7, 2, 8, 6]	[2, 3, 5, 6, 7, 8, 10]	The array is sorted in ascending order.
3	[1, 2, 3, 4, 5]	[1, 2, 3, 4, 5]	The array is already sorted in ascending order.

Try it yourself

Try solving this question here:

Java

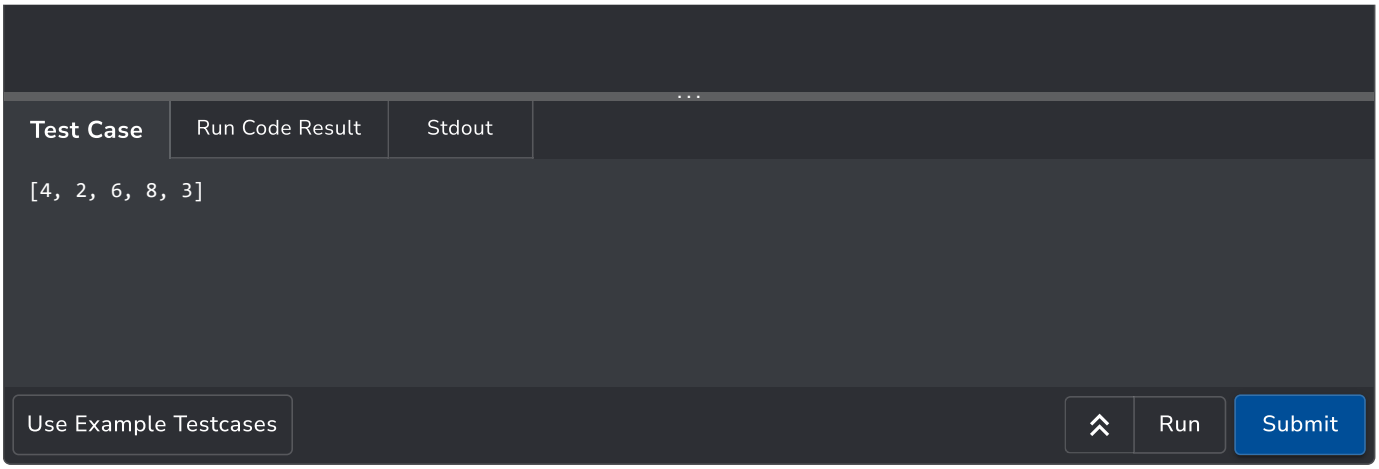

```java
import java.util.List;

public class Solution {

  public List<Integer> sort(List<Integer> array) {
    // TODO: Write your code here
    return array;
  }

}

```
