Quiz: Kafka

Test your knowledge of Kafka by completing this quiz.

Quiz ?

Statement

In Kafka, messages are published to

Select Multiple Options

False
- [ ] A category

Correct
- [x] A topic

False
- [ ] A subject

False
- [ ] A Domain

Check Answer

Correct Answer ✓

Quiz ?

Statement

Once a message is written to Kafka, it can be changed:

Select Option

- ○ Only by the producer who initially wrote it
- ○ By any producer

Correct ✓

- ◉ Never
- ○ By the controller broker

Check Answer

Quiz ?

Statement

How many brokers will be marked as leaders of a partition?

Select Multiple Options

False ✗

- ☐ Zero

Correct ✓

- ☑ One

False ✗

- ☐ Five

False ✗

- ☐ All in-sync replicas (ISR)

Check Answer

Correct Answer ✓

Quiz ?

Statement

What is the default partition strategy for producers without using a key?

Select Multiple Options

Correct ✓

- [x] Round-robin

False ✗

- [ ] Broker with the lowest load is preferred

False ✗

- [ ] Partition with the lowest write load is preferred

False ✗

- [ ] Partition with the lowest read load is preferred

Check Answer

Correct Answer ✓

Quiz ?

Statement

Within a partition, a message is uniquely identified by its

Select Multiple Options

Correct

- [x] Offset

False

- [ ] Key

False

- [ ] ID

False

- [ ] Timestamp

Check Answer

Correct Answer

Quiz ?

Statement

Can two consumers from two different consumer groups consume the same message?

Select Multiple Options

Correct

- [x] Yes

- [ ] No

Check Answer

Correct Answer ✓

Quiz ?

Statement

Which of the following statement is true about a Kafka topic?

Select Multiple Options

False ⊗

- [ ] Only a single producer can publish messages to a topic.

False ⊗

- [ ] Only a single consumer can subscribe to the messages of a topic.

False ⊗

- [ ] A consumer can insert a message into any offset within a topic.

Correct ✓

- [x] Multiple consumers can subscribe to the messages written to a topic.

Check Answer

Correct Answer ✓

Quiz ?

Statement

Test your knowledge of Kafka by completing this quiz.

| * Does each consumer group have its own offset for every partition of a topic?

Select Multiple Options

Correct

- [x] A) Yes

Explanation

For each consumer group, Kafka stores the current offset for every partition of a topic.

False

- [ ] B) No

Check Answer

Correct Answer

Quiz ?

Statement

Which statement about consumer groups is not true?

Select Multiple Options

False

- [ ] Each partition of a topic can be assigned to only one consumer in a consumer group.

False

- [ ] Different partitions of a topic can be assigned to a consumer in a consumer group.

False

- [ ] If a consumer stops, Kafka spreads its partitions across the remaining consumer in the same consumer group.

Correct

Explanation

Kafka **does not** guarantee that each

- [x] Within a consumer group, Kafka ensures that each consumer receives at least one partition of a topic.

consumer receives at least one partition of a topic within a consumer group. For example, when the number of consumers exceeds the number of partitions in a topic, all new consumers **wait in idle mode** until an existing consumer unsubscribes from that partition.

Check Answer

Correct Answer ✓

Quiz ?

Statement

What is the optimum number of consumers within a consumer group?

Select Multiple Options

False ⊗

- [ ] Greater than the number of partitions of the topic they are consuming

Correct ⊘

- [x] Equal to the number of partitions of the topic they are consuming

False ⊗

- [ ] Less than the number of partitions of the topic they are consuming

Check Answer

Correct Answer ✓

Quiz ?

Statement

Does Kafka guarantee that messages with the same 'key' are written to the same partition?

Select Multiple Options

Correct ✓

- [x] Yes

False ✗

- [ ] No

Check Answer

Correct Answer ✓

Quiz ?

Statement

Kafka can use the following criteria to delete old messages. Select all that apply.

Select Multiple Options

Correct ✓

- [x] Time-based limits

Correct ✓

- [x] Size-based limits

False ✗

- [ ] Key-based limits

Correct

- [x] Compaction

Check Answer
