Sum of Path Numbers (medium)

Problem Statement

Given a binary tree where each node can only have a digit (0-9) value, each root-to-leaf path will represent a number. Find the total sum of all the numbers represented by all paths.

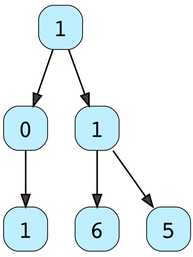

Example 1:

Output: 408
Explanation: The sum of all path numbers: 17 + 192 + 199

Example 2:

Output: 332
Explanation: The sum of all path numbers: 101 + 116 + 115

Try it yourself

Try solving this question here:

Java

```
/*class TreeNode {
  int val;
  TreeNode left;
  TreeNode right;

  TreeNode(int x) {
    val = x;
  }
};*/

class Solution {
  public int findSumOfPathNumbers(TreeNode root) {
    // TODO: Write your code here
    return 0;
  }
}
```

Test Case | Run Code Result | Stdout

[1,0,1,1,null,6,5]

Use Example Testcases | Run | Submit
