Merge Intervals (medium)

Problem Statement

Given a list of intervals, **merge all the overlapping intervals** to produce a list that has only mutually exclusive intervals.

Example 1:

```
Intervals: [[1,4], [2,5], [7,9]]
Output: [[1,5], [7,9]]
Explanation: Since the first two intervals [1,4] and [2,5] overlap, we
merged them into one [1,5].
```

Example 2:

```
Intervals: [[6,7], [2,4], [5,9]]
Output: [[2,4], [5,9]]
Explanation: Since the intervals [6,7] and [5,9] overlap, we merged them
into one [5,9].
```

Example 3:

```
Intervals: [[1,4], [2,6], [3,5]]
Output: [[1,6]]
Explanation: Since all the given intervals overlap, we merged them into
one.
```

Try it yourself

Try solving this question here:

Java

```java
import java.util.*;

/*class Interval {
  int start;
  int end;

  public Interval(int start, int end) {
    this.start = start;
    this.end = end;
  }
};*/

class Solution {

  public List<Interval> merge(List<Interval> intervals) {
    List<Interval> mergedIntervals = new LinkedList<Interval>();
    // TODO: Write your code here
    return mergedIntervals;
  }
}
```

Test Case | Run Code Result | Stdout

[[1,4], [2,5], [7,9]]
