Longest Substring with Same Letters after Replacement (hard)

Problem Statement

Given a string with lowercase letters only, if you are allowed to **replace no more than 'k' letters** with any letter, find the **length of the longest substring having the same letters** after replacement.

Example 1:

```
Input: String="aabccbb", k=2
Output: 5
Explanation: Replace the two 'c' with 'b' to have a longest repeating substring "bb
bbb".
```

Example 2:

```
Input: String="abbcb", k=1
Output: 4
Explanation: Replace the 'c' with 'b' to have a longest repeating substring "bbbb".
```

Example 3:

```
Input: String="abccde", k=1
Output: 3
Explanation: Replace the 'b' or 'd' with 'c' to have the longest repeating substrin
g "ccc".
```

Try it yourself

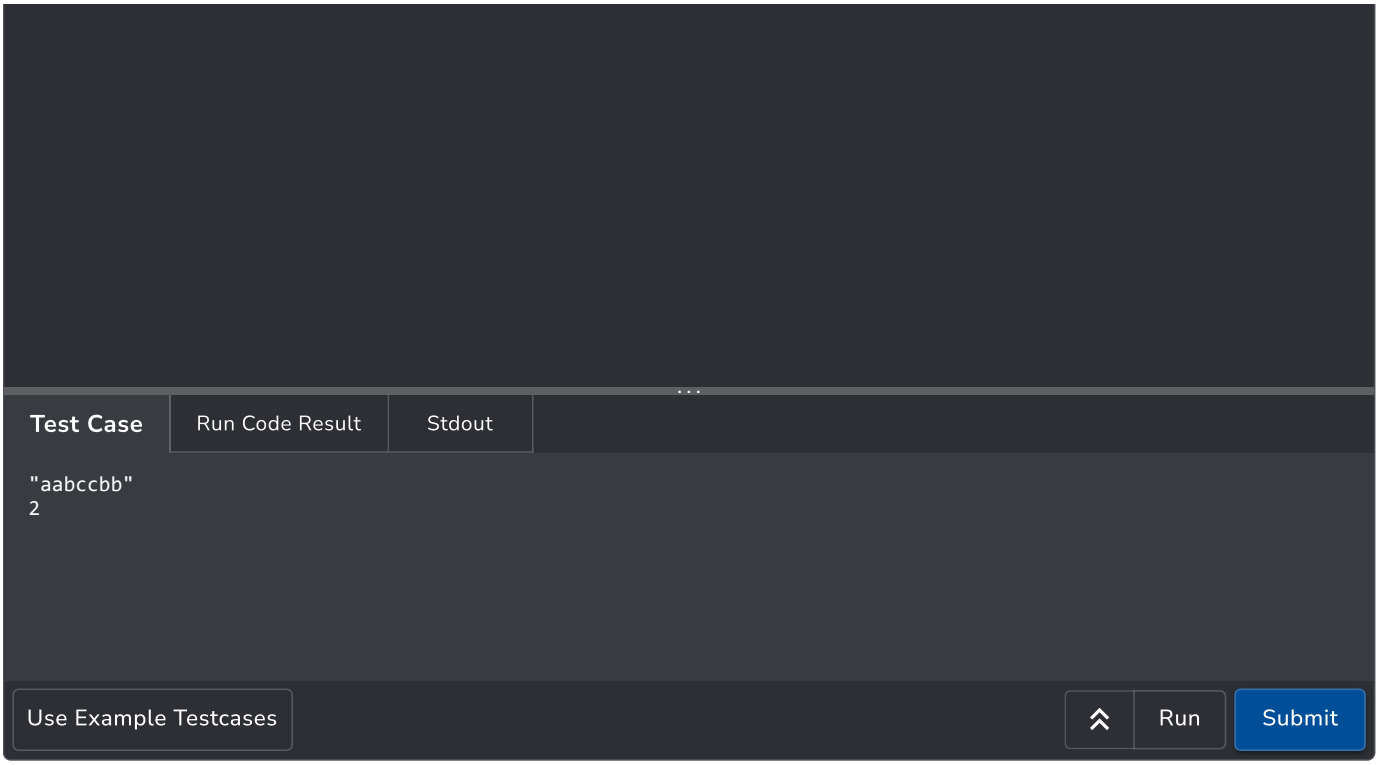

Try solving this question here:

Java

```
import java.util.*;

class Solution {
  public int findLength(String str, int k) {
      int maxLength = 0;
      // TODO: Write your code here
      return maxLength;
  }
}

```
