Valid Anagram (easy)

Problem Statement

Given two strings `s` and `t`, return `true` if `t` is an anagram of `s`, and `false` otherwise.

An **Anagram** is a word or phrase formed by rearranging the letters of a different word or phrase, typically using all the original letters exactly once.

Example 1:

```
Input: s = "listen", t = "silent"
Output: true
```

Example 2:

```
Input: s = "rat", t = "car"
Output: false
```

Example 3:

```
Input: s = "hello", t = "world"
Output: false
```

Try it yourself

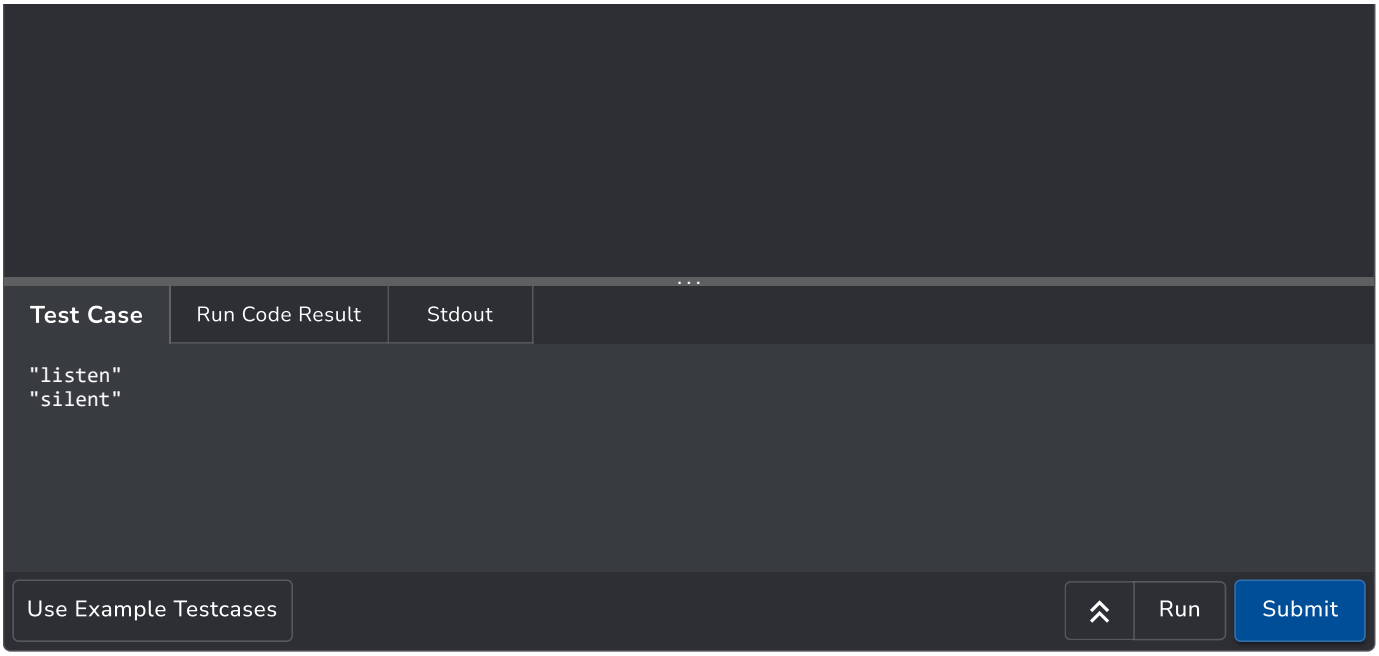

Try solving this question here:

Java

```java
import java.util.HashMap;

class Solution {
  public boolean isAnagram(String s, String t) {
    // TODO: Write your code here
    return true;
  }
}

```
