Dutch National Flag Problem (medium)

Problem Statement

Given an array containing 0s, 1s and 2s, sort the array in-place. You should treat numbers of the array as objects, hence, we can't count 0s, 1s, and 2s to recreate the array.

The flag of the Netherlands consists of three colors: red, white and blue; and since our input array also consists of three different numbers that is why it is called **Dutch National Flag problem**.

Example 1:

```
Input: [1, 0, 2, 1, 0]
Output: [0 0 1 1 2]
```

Example 2:

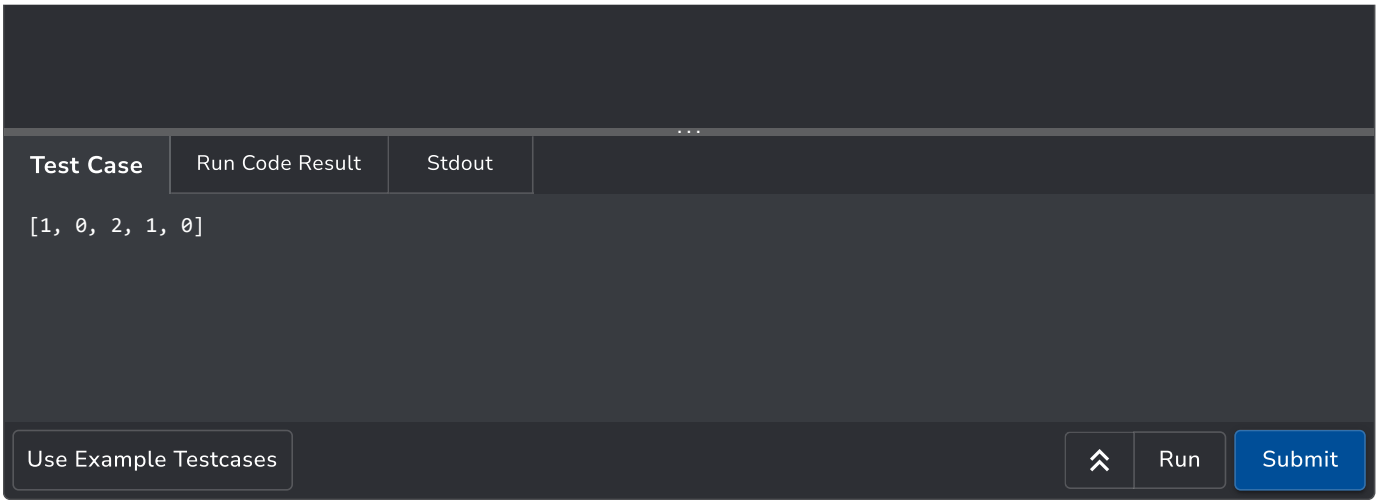

```
Input: [2, 2, 0, 1, 2, 0]
Output: [0 0 1 2 2 2 ]
```

Try it yourself

Try solving this question here:

Java

```
class Solution {
  public int[] sort(int[] arr) {
    // TODO: Write your code here
    return arr;
  }
}
```
