Squaring a Sorted Array (easy)

Problem Statement

Given a sorted array, create a new array containing squares of all the numbers of the input array in the sorted order.

Example 1:

```
Input: [-2, -1, 0, 2, 3]
Output: [0, 1, 4, 4, 9]
```

Example 2:

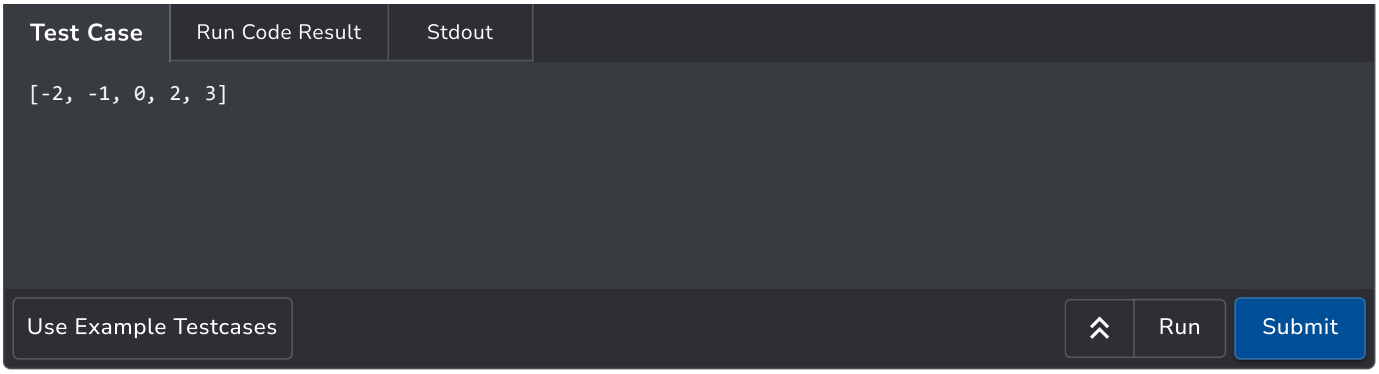

```
Input: [-3, -1, 0, 1, 2]
Output: [0, 1, 1, 4, 9]
```

Try it yourself

Try solving this question here:

Java

```
class Solution {
  public static int[] makeSquares(int[] arr) {
    int n = arr.length;
    int[] squares = new int[n];
    // TODO: Write your code here
    return squares;
  }
}
```
