Triplet Sum to Zero (medium)

Problem Statement

Given an array of unsorted numbers, find all unique triplets in it that add up to zero.

Example 1:

```
Input: [-3, 0, 1, 2, -1, 1, -2]
Output: [[-3, 1, 2], [-2, 0, 2], [-2, 1, 1], [-1, 0, 1]]
Explanation: There are four unique triplets whose sum is equal to zero. smallest
sum.'
```

Example 2:

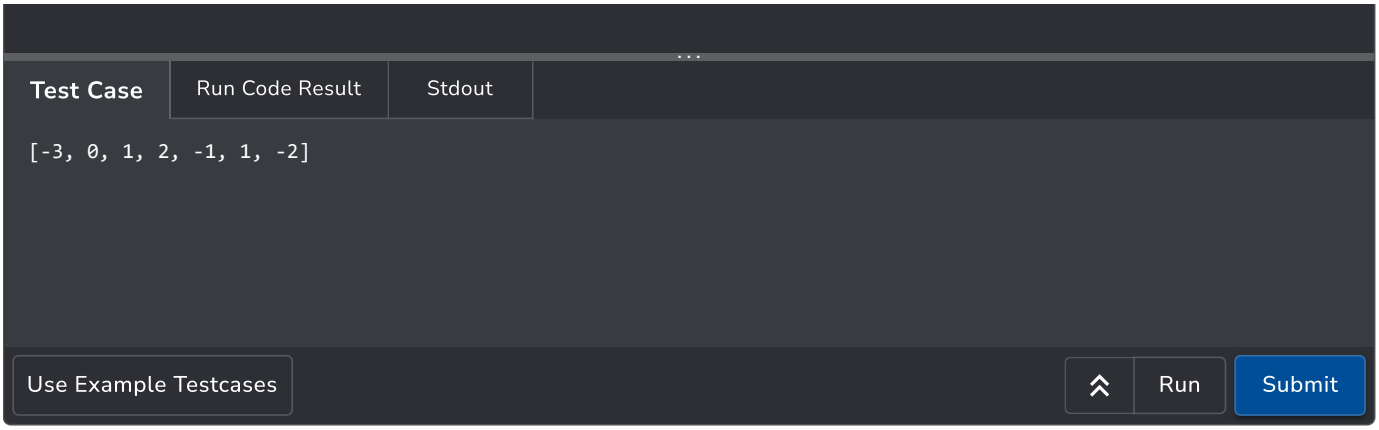

```
Input: [-5, 2, -1, -2, 3]
Output: [[-5, 2, 3], [-2, -1, 3]]
Explanation: There are two unique triplets whose sum is equal to zero.
```

Try it yourself

Try solving this question here:

Java

```
1  import java.util.*;
2
3  class Solution {
4
5    public static List<List<Integer>> searchTriplets(int[] arr) {
6      List<List<Integer>> triplets = new ArrayList<>();
7      // TODO: Write your code here
8      return triplets;
9    }
10 }
11
```
