Equal Subset Sum Partition (medium)

Statement

Given a set of positive numbers, find if we can partition it into two subsets such that the sum of elements in both subsets is equal.

Example 1:

```
Input: {1, 2, 3, 4}
Output: True
Explanation: The given set can be partitioned into two subsets with equal sum: {1, 4} & {2, 3}
```

Example 2:

```
Input: {1, 1, 3, 4, 7}
Output: True
Explanation: The given set can be partitioned into two subsets with equal sum: {1, 3, 4} & {1, 7}
```

Example 3:

```
Input: {2, 3, 4, 6}
Output: False
Explanation: The given set cannot be partitioned into two subsets with equal sum.
```

Try it yourself

Try solving this question here:

Java

```
1  public class Solution {
2    public boolean canPartition(int[] num) {
3      //TODO: Write - Your - Code
4      return false;
5    }
6  }
7
```

Test Case | Run Code Result | Stdout

```
[1,2,3,4]
```

Use Example Testcases | Run | Submit
