Minimum Subset Sum Difference (hard)

Problem Statement

Given a set of positive numbers, partition the set into two subsets with minimum difference between their subset sums.

Example 1:

```
Input: {1, 2, 3, 9}
Output: 3
Explanation: We can partition the given set into two subsets where minimum absolute
difference
between the sum of numbers is '3'. Following are the two subsets: {1, 2, 3} & {9}.
```

Example 2:

```
Input: {1, 2, 7, 1, 5}
Output: 0
Explanation: We can partition the given set into two subsets where minimum absolute
difference
between the sum of number is '0'. Following are the two subsets: {1, 2, 5} & {7,
1}.
```

Example 3:

```
Input: {1, 3, 100, 4}
Output: 92
Explanation: We can partition the given set into two subsets where minimum absolute
difference
between the sum of numbers is '92'. Here are the two subsets: {1, 3, 4} & {100}.
```

Try it yourself

Try solving this question here:

Java

```
class Solution {

  public int canPartition(int[] num) {
    // TODO: Write your code here
    return -1;
```

```
    }
  }

```

Test Case | Run Code Result | Stdout

```
[1,2,3,9]
```

Use Example Testcases | Run | Submit
