Problem 2: Reverse a String

Problem Statement

Given a string, write a function that uses a stack to reverse the string. The function should return the reversed string.

Examples

Example 1:

```
Input: "Hello, World!"
Output: "!dlroW ,olleH"
```

Example 2:

```
Input: "OpenAI"
Output: "IAnepO"
```

Example 3:

```
Input: "Stacks are fun!"
Output: "!nuf era skcatS"
```
