Equal Subset Sum Partition

Problem Statement

Given a set of positive numbers, find if we can partition it into two subsets such that the sum of elements in both the subsets is equal.

Example 1:

```
Input: {1, 2, 3, 4}
Output: True
Explanation: The given set can be partitioned into two subsets with
equal sum: {1, 4} & {2, 3}
```

Example 2:

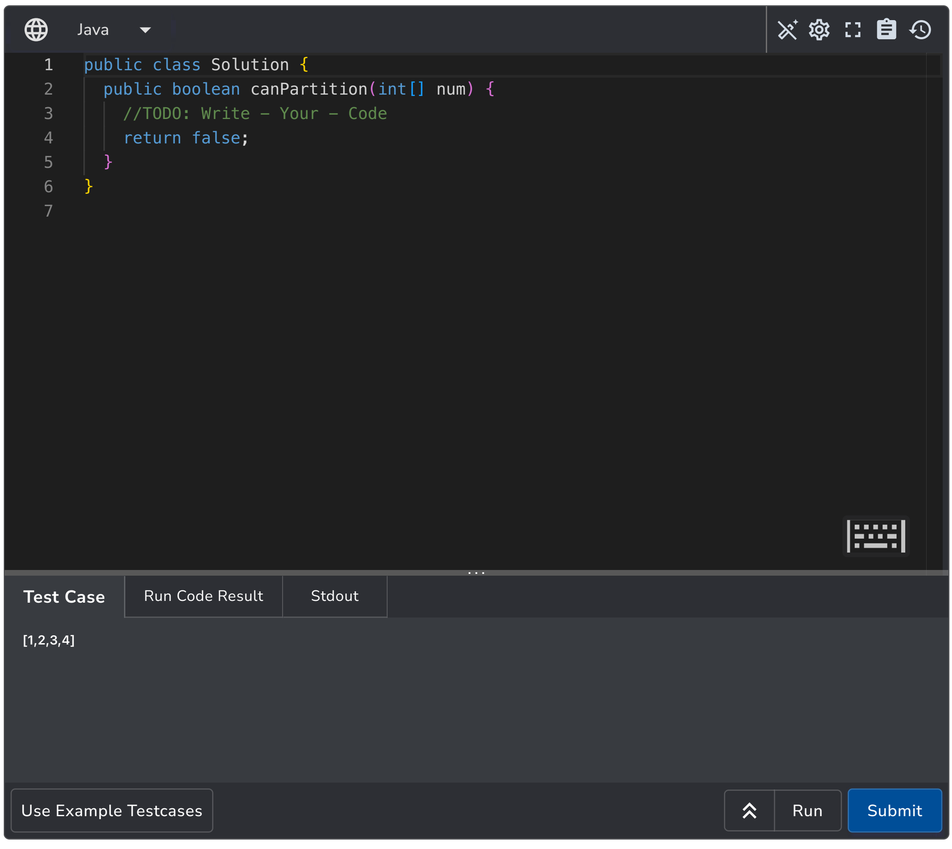

```
Input: {1, 1, 3, 4, 7}
Output: True
Explanation: The given set can be partitioned into two subsets with
equal sum: {1, 3, 4} & {1, 7}
```

Example 3:

```
Input: {2, 3, 4, 6}
Output: False
Explanation: The given set cannot be partitioned into two subsets with
equal sum.
```

Try it yourself

This problem looks similar to the 0/1 Knapsack problem, try solving it before moving on to see the solution:
