Connect Level Order Siblings (medium)

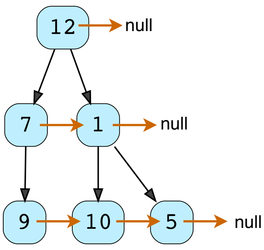

Problem Statement

Given a binary tree, connect each node with its level order successor. The last node of each level should point to a `null` node.

Example 1:

Example 2:

Try it yourself

Try solving this question here:

```
Java
1  import java.util.*;
2
3  /*class TreeNode {
4    int val;
5    TreeNode left;
6    TreeNode right;
7    TreeNode next;
8
9    TreeNode(int x) {
10     val = x;
11     left = right = next = null;
12   }
13 };*/
14
15 class Solution {
16   public TreeNode connect(TreeNode root) {
17     // TODO: Write your code here
18     return root;
19   }
20 }
21
```

Test Case | Run Code Result | Stdout
