Problem Challenge 2: Target Sum (hard)

Problem Statement

You are given a set of positive numbers and a target sum ‘S’. Each number should be assigned either a ‘+’ or ‘-’ sign. We need to find the total ways to assign symbols to make the sum of the numbers equal to the target ‘S’.

Example 1:

```
Input: {1, 1, 2, 3}, S=1
Output: 3
Explanation: The given set has '3' ways to make a sum of '1': {+1-1-2+3}
& {-1+1-2+3} & {+1+1+2-3}
```

Example 2:

```
Input: {1, 2, 7, 1}, S=9
Output: 2
Explanation: The given set has '2' ways to make a sum of '9': {+1+2+7-1}
& {-1+2+7+1}
```

Try it yourself

Try solving this question here:

Java

```
class Solution {

  public int findTargetSubsets(int[] num, int s) {
    // TODO: Write your code here
    return -1;
  }

}

```

Test Case | Run Code Result | Stdout

[1,1,2,3]
1
