Maximum Product Subarray (Medium)

Problem Statement

Given an integer array, find the contiguous subarray (at least one number in it) that has the maximum product. Return this maximum product.

Examples

1.
   - **Input**: [2,3,-2,4]
   - **Expected Output**: 6
   - **Justification**: The subarray [2,3] has the maximum product of 6.

2.
   - **Input**: [-2,0,-1]
   - **Expected Output**: 0
   - **Justification**: The subarray [0] has the maximum product of 0.

3.
   - **Input**: [-2,3,2,-4]
   - **Expected Output**: 48
   - **Justification**: The subarray [-2,3,2,-4] has the maximum product of 48.

Try it yourself

Try solving this question here:

Java

```java
public class Solution {
    public int maxProduct(int[] nums) {
        int maxProduct = nums[0];
        // ToDo: Write Your Code Here.
        return maxProduct;
    }
}

```

Test Case | Run Code Result | Stdout

[2,3,-2,4]
